Annamacharya Institute of Technology and Sciences started conducting Add on Program courses to develop the required skills and personality to suit the competitive world. After proper introduction to the students of different discipline and levels, the course was structured to suit the needs.

The Problem-Solving techniques honed in discrete mathematics are necessary for writing complicated software. Students who are successful in discrete mathematics will be able to generalize from a single instance of a problem to an entire class of problems, and to identify and abstract patterns from data.

A Report on Add on Program Course “Automation and Robotics ” organized by

Mr.P.Mallikarjuna Reddy , Assistant Professor, Mechanical department from 27/01/2021 to 03/03/2021

Introduction-

Annamacharya Institute of Technology and Sciences started conducting Add on Program courses to develop the required skills and personality to suit the competitive world. After proper introduction to the students of different discipline and levels, the course was structured to suit the needs.

Automation reduces time, effort and cost, whilst reducing manual errors, giving your business more time to focus on your primary objectives. The use of robotics will increase productivity and has the potential to bring more manufacturing production work back to developed countries. As productivity increases, labor is likely to receive a significant share of the benefits.
