

The best practices identified are as follows:

1. Courses that enhance Employability Skills
2. Developing the students According to their aspirations.

Best Practice 1:

Title of the Practice: Training programs for students to enhance their skill sets for a holistic development.

Objectives of the Practice: To train students on life skills so that they can excel in their academics and also in the careers of their choice. To train for Campus Recruitments.

The Context:

- Students from vernacular backgrounds need additional training to acquire the skills expected by recruiting companies.
- Most of the students admitted through lateral-entry i.e., with a diploma qualification, need more grooming to perform on-par with the other students.
- To provide requisite training for students to improve their prospects of being recruited in Product Development and/or Consulting and service-based companies.

The Practice:

The Institution provides well-structured skill training programs for students of all branches of B.TECH, M.Tech and beginning from their initial semesters itself, which helps them learn progressively. The details of the training.

Programs are Mentioned Below:

- English language and communication skill course is part of the curriculum, in I and II Semesters, which help in honing the communication skills of the students. A class of 60 students is divided into 3 batches of 20 each and they are given ear- training in the Phonetics lab, thus enabling them to get rid of their mother tongue influence when speaking in English. In the Interactive Communication skills lab students actively participate in group discussions, public speaking, debates and presentations, while in the Reading lab students are taught various comprehension strategies to enable them to read different text types.
- In addition to the above, the students also undergo 56 hours of training in III Semester and 56 hours of training in IV semester, to enhance the LSRW skills (Listening, Speaking, Reading and Writing). These training sessions are conducted with an objective to improve the comprehension skills of students. Also during the III and the IV semesters, a class of 72 students is divided into two batches, each consisting of 36 students. Two trainers are provided for each batch to ensure that every student gets the

TECHNOLOGY & SCIENCES
C.K. Dinne (V&M),
KADAPA - 516 003. (A.P.)

attention needed thus making sure that there is maximum participation. Students are given team tasks and activities thus encouraging participative learning.

- Furthermore, during the V and VI semesters, training is imparted on soft-skills such as Quantitative, Logical, Aptitude, Verbal, Reasoning to mention a few. This aids in preparing the students for the recruitment process, for entrance exams for higher studies and for other competitive examinations. The students are also provided with on-line resources (on-line videos) and on-line tests, every week, to enable them to prepare for all the above mentioned exams.
- The classes conducted during the III, IV, V and VI semesters are outsourced to third-party training partners. This is done because the trainers have industry experience and understand the need to bridge the gap between the curricula and the industry requirement and the demands the industry makes on fresh graduates. The students are given inputs based on the requirements of various companies.
- The third-party training partners also take care of providing on-line resources like on-line videos and on-line practice tests every week and they also monitor the performance of the students in the online tests. They share the reports of the performance of the students in the on-line tests with the respective departments.
- In the academic year 2017-2018, the Institution also started Technical Skills Training programs and embedded it into the curriculum, for the students graduating in the year 2019. This is owing to the fact that the model of recruitment process by various companies has changed. Most of the recruiting companies are now expecting the students to have basic programming skills irrespective of the branch of engineering they pursue. These Technical Skills Training programs include IT related skills namely Fundamental Programming Skills and Advanced Programming Skills.
- Based on the feedback of the students graduating in the year 2019 and on their success in the recruitment process, the Institution decided to continue with the Technical Skills training programs making significant modifications as and when required based on the industry needs so that the students are better prepared for the recruitment process.
- The CRT (Campus Recruitment Training) program is conducted for the students during the summer vacation between VI and VII semesters. This program includes 140 hours of training in communication and aptitude skills. This is done to reinforce the skills students acquire as part of the training conducted in III, IV, V and VI semesters. Besides these skills, the students are also trained in Group Discussions, Resume Preparation and Interview Skills. They are also given company specific online practice tests every alternate day, during this training period. Based on the performance in these tests, the training sessions are customized to cater to the needs of the students and the industry, constantly monitoring their performance and making them adept at these skills.

KADAPA - 516 003. (A.P.)

- Pre, mid and post assessment tests are administered to the students by M/s. Cocubes, which provides a proficient on-line assessment tool. M/s. Cocubes is also a hiring agency. The pre assessment test helps in identifying the training needs of the students and assists in customizing the training imparted based on their student competencies. Based on the scores obtained by the students in the pre-assessment test, the students are divided into batches. After the pre-assessment test the student's performance is re-evaluated in the mid-assessment and the training sessions are then oriented to fix the gaps. A post-assessment test helps the students to understand their areas of improvement, if any, so that they can enhance their proficiency levels during the training. The post-test also helps the institution to identify the effectiveness of the training programs and make changes, if needed, accordingly.
- The pre-assessment test is conducted before the commencement of the CRT. The mid-assessment test is conducted after two weeks of training. The post-assessment test is conducted on completion of the CRT sessions.
- Company-specific online practice tests are also provided to the students just before a particular company visits the campus for the recruitment process. This helps the students in preparing for their recruitment.
- Every year many students across all the branches of B.TECH, M.Tech secure internships in industries of their respective discipline.

Evidence of Success:

With the combined effort and commitment of the institution and students, the institution has achieved very good results during on-campus recruitment processes. This has led to the increase in the quality, as well as, number of recruitments. Placement Summaries for the last 5 years indicate that the students have been performing

Consistently well and are recruited by reputed companies and the average pay package has been increasing year after year.

- 2016-2017 – 65 students secured jobs with an average pay package of Rs. 3.5 LPA
- 2017-2018 – 70 students secured jobs with an average pay package of Rs. 4.00 LPA
- 2018-2019 – 79 students secured jobs with an average pay package of Rs. 4.25 LPA
- 2019-2020 - 55 students secured jobs with an average pay package of Rs. 4.5 LPA
- 2020-2021 – 108 students secured jobs with an average pay package of Rs. 5.25 LPA

PRINCIPAL
ANNAMACHARYA INSTITUTE OF
TECHNOLOGY & SCIENCES
C.K. Dinne (V&M),
KADAPA - 516 003. (A.P.)

Problems Encountered:

- Some of the students, though academically capable, could not afford the cost for the training due to their poor economic background. The college supports these students by extending financial assistance.

Resources Required:

- Professional trainers for imparting training.
- Resources to conduct training i.e., video lectures on topics in communication and aptitude, online exams for practice purpose, company-specific mock tests, etc.

Best practice 2:

Title of the Practice: Developing the students according to their aspirations.

Objectives of the Practice:

1. To encourage the students aspirations.
2. To give an awareness about the opportunities which are available in private and Government sector
3. To motivate the students to join in Higher Education.
4. To motivate the students to reach the high position in their fields.
5. To motivate the students to join in Service sector

The Context:

The institute has been motivating the students to develop according to their aspirations. The institute has been trying to understand the students through the ways they grow and develop. It is important for the institute to understand that every student is different and therefore, will learn in their own ways. The institute meets the needs of all students specifically by creating learning experiences for all to comprehend. Differentiated instruction would be helpful in a classroom in order to meet the needs of students who have differences when it comes to interests, readlines and learning needs.

The Practice:

1. various events has been conducted every year. as a part of the cultural event, literary writer and senior Actor sri Tanikella Bharani from Telugu Industry were invited to encourage the students to aspire their aspirations.

2. Eminent politicians have been invited to the college to encourage the students to enter into the service sector and help the society.
